FOREWORD

The population data shown in this report are based on records of residents registered with Manitoba Health as at June 1, 2017.

Data for the regions include population of cities, towns, villages, rural municipalities, local government districts, and unorganized territories. It should be noted that villages and towns are separately identified if these are incorporated. If unincorporated, the population counts are included in the rural municipality in which these are located.

Population for small areas (for example, a rural town) can be biased because the mailing address may be reported as the place of residence. An individual residing outside the town, but having a mailing address there, may be counted as living within the town. This bias in the population figures is reduced as the catchment area increases. Thus, regional estimates are not significantly affected by the mis-classification bias. Fluctuations from year to year for these small areas might also be affected by changes to mail delivery locations assigned by Canada Post.

The type of place indicates First Nations, unorganized territory, and municipal status of incorporated places (city, town, village, rural municipality, and local government district). The following list indicates the abbreviations used for types of places:

FN	First Nation Band
LGD	Local Government District - a designated area having no local government; administered by the province through a resident administrator.
R.H.A.	Regional Health Authority
RM	Rural Municipality

POPULATION REPORTING CHANGES

Current-year and five-year populations for RHA Districts were tabulated using the RHA District definitions current as of June 1st, 2016.

MUNICIPAL AMALGAMATIONS

A series of municipal amalgamations, which were enacted between November 2013 and May 2014, came into effect as of January 1st, 2015. The 2017 population reports use the amalgamated municipalities, because these municipalities are the municipalities defined at the population date. Populations by pre-amalgamation municipality were provided as an appendix to the 2015 population reports; these pre-amalgamation populations have not been provided in the 2017 reports, however, and will not be provided as part of population reports for future years either.
